Sciences & history

Career Summary

I was born in Syria where I got my baccalaureate, I then went into medical school and after graduating came to UK for training,

I then went for a MSc in Clinical Oncology at Birmingham University and afterwards travelled to Seattle, USA for a fellowship then back to become a consultant at Southampton hospital and a senior lecturer at University.

What inspired you?

The beauty of the heart,

The intricate relationship between biological systems with only a few simple & basic laws.

The similarities & diversities you see in human body systems!

Describe your job

- Exciting
- Engaging
- Fun
- Science in action

Did you know .....

No two cells are alike!

Top tip

Have an inquisitive mind to see the beauty in the design and the science to understand it and simulate it

Best thing about my job

The journey to gain more knowledge and understanding of systems & human nature and interacting POSITIVELY with both
