Symbol-Assisted Story

Safe Practices - Hand Washing

Hand Washing

Since Coronavirus arrived we have had to wash our hands more

often. We wash them with soap and water or

hand sanitiser. This is to help stop Coronavirus spreading.

We need

to wash our hands

more

because

Coronavirus

can

spread

on

our

hands.

If

Coronavirus

is on

our

hands,

it can

move onto

things we

touch.

When other

people

touch

it,

they

can

catch

Coronavirus.

Washing our hands

removes

and

kills

any

virus

that might be

on

them. This

helps

stop

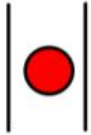

Coronavirus

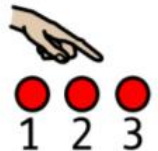

spreading.

When we  wash our hands we  need to be very  careful that we  wash

all of our  hands  and  fingers. We  need to  wash the back of our  hands

 and  in between the  fingers too.

 We should  wash our hands for **20**  seconds. To  know  how long

 to wash for, we can  count  slowly to **20** or  sing

 **2x**
happy birthday twice.

Thank you

for

washing your hands

and

helping

to

stop

Coronavirus

from

spreading.

Thank you

for

helping

stop

Coronavirus.
